Safety isolating transformer

EL 28/18

Advantages

Solder tab for free wiring

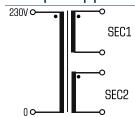

Very good corrosion protection and low noise thanks to BLOCK IMPEX vacuum impregnation $% \left(1\right) =\left(1\right) \left(1\right) \left$

Simple mounting thanks to robust metal footplate with oval slots

Applications

Safety isolating transformer for the safe electrical isolation of the input and output sides. The transformer is suitable for creating SELV and PELV circuits because of the limit on the output voltage.

Sample application

Standards

Safety isolating transformer to: VDE 0570 Part 2-6, DIN EN 61558-2-6, EN 61558-2-6, IEC 61558-2-6

Approvals

Safety isolating transformer **EL 28/18**
