

## Conditions of Acceptability -

1. The transformers, **except otherwise noted**, are provided with a Class 105 insulation system.

The manufacturer claims that the insulating system is suitable for  
rating.  
120°C. UL has not evaluated the insulating system for this

2. These components have been judged on the basis of the required spacing in the Standard for Electronic Data Processing Equipment (UL 478) which covers the end-use product for which the component was intended.

# Primary winding 400 V max. In regard to IEC 38 "IEC Standard Voltages"

3. Only FLN series are provided with a Class 130B insulation System **OBJY2** (E216803).
